Comments by the CFO

Dear Stakeholders,

In 2015, the Group performance improved considerably compared to the previous year. With the key mine at Tardan increasing production and grade.

During the second half of 2015, mining at Tardan commenced on the Barsuchy deposit. The combination of higher grades at Barsuchy and in the Tardan deposit allowed us re-launch the gravitational plant.

Ore grade and volume mined at Tardan significantly increased in 2015 to 3.03 g/t (2014 - 1.77 g/t). Volume of ore mined at Tardan in 2015 increased by 18%, compared to 2014, up to 449,000 tonnes. Total production of gold at Tardan was 817 kg (average cash cost per ounce of US\$ 798 in). In 2015, consolidated gross profit of US\$ 4.7 m and positive EBITDA of US\$ 10.3 m was a significant improvement on 2014 where the company achieved a consolidated gross loss of US\$ -6.1 m and negative EBITDA of \$-4.1 m.

Mining at the Solcocon mine temporarily stopped during the year, whilst exploration work took place in the hard rock and alluvial deposits. Auriant will not recommence hard rock gold production at Solcocon in 2016, but will focus on the further development of Tardan. Planned production at Tardan in 2016 will be 1 ton of gold. As a result of terminating production at Solcocon, Solcocon assets had been impaired by MSEK 133.0 (US\$ 16.0 m), as at December 31st 2015; this is a non cash provision. Auriant is looking at various options for Solcocon and these could result in a reverse of the impairment provision.

All changes in financial results shown in per cent (%) relate to changes in US\$ amounts.

Income, financial results and financial position for the Group

Income and financial results

Average realized gold price decreased by 7% from US\$ 1,244 in 2014 to US\$ 1,161. Revenue from gold and gold equivalents decreased by MSEK -45,246 (US\$ -12,798 m), or 30%, compared to 2014. The volume of gold sold decreased by 25% from 1,066 kg (34,273 oz) in 2014 down to 799 kg (25,698 oz) in 2015. This was mostly due to the fact that alluvial production, providing 30% of gold sales in 2014, was put on hold in 2015 for sand stripping activities to be performed by our outsourced contractor Urumkan. Production at Tardan, our main hard rock gold producing asset, increased to 817 kg (26,275 oz) compared to 672 kg (21,628 oz) in 2014.

	2015	2014	Change	Change %

Revenue from management services	3,600	-	3,600	100%
Revenue net of alluvial costs	33,429	33,404	25	0%

In 2015, Auriant managed five gold properties located in Russia's Chukotka region, including Valunisty - a producing gold mine (these properties belong to Aristus Holdings Ltd.). The Company earned a total management fee of MSEK 30.6 (US\$ 3.6 m) as a result of the successful fulfillment of set KPIs. Revenue from management services earned in 2015 compensated for the absence of net margin from alluvial production of MSEK 21.0 (US\$ 3.0 m) in 2014.

Cost of sales (less the cost of alluvial gold) decreased in 2015 by 27% compared to the previous year. This resulted in a smaller cash costs per ounce of gold produced at Tardan from 1,060/oz in 2014 down to US\$ 798/oz in 2015.

General and administrative expenses decreased by MSEK 1.960 (US\$ 1.208 m), or 24%, as compared to 2014.

Other income in both periods primarily consisted of services to external parties, such as contractors. In 2015 the Company rented out Solcocon's mining equipment to cover its costs.

Other operating expenses in both periods included bank commissions, provisions, penalties and other expenses (each of them were not significant by themselves), which have not changed significantly.

Financial income in the current period represents foreign exchange gain. In 2014, there was a forex loss which amounted to MSEK -51.725 (US\$ -5.010 m) and was recorded as financial expenses.

Financial expenses in 2015 were represented by interest expenses. The interest expense for the reporting period decreased by 23% and amounted to MSEK -64.8 (US\$ -7.863 m) as compared to MSEK -68.713 (US\$ -10.000 m) of 2014. Interest expenses reduced mainly as a result of the shareholder's bond interest rate reduction - the bond carries an interest rate of 2% p. a. since March 2015; in the period from May 2014 to February 2015 it was 10% p.a.; prior to May 2014 it was 18% p. a.

Since the Company incurred taxable losses the income tax expense in both periods related to a change in deferred tax at the subsidiaries level and represents tax loss carry-forward movements including a deferred tax asset impairment provision at Solcocon of MSEK 14.7 (US\$ 1.8 m).

The net result after tax for 2015 is MSEK -178.597 (US\$ -21.494 m) as compared to MSEK -128.665 (US\$ -16.591 m) in previous period. Earnings per share before and after dilution for the period were equal to SEK -10.03 (US\$ -1.21) compared to 2014 of SEK -7.23 (US\$ -0.93).

Financial position

In May 2015, the Company came to an agreement with the majority Shareholder to reduce the interest rate on the Shareholder's bond from 10% p.a. to 2% p.a. These changes are effective from 1 March 2015. In exchange, the majority Shareholder has been offered an option to redeem US\$ 20 m of the outstanding bond amount in the form of cash or new shares, or a combination of both. The conversion date is at the discretion of the Shareholder until December 31, 2018. In accordance with International Financial Reporting Standards, part of the debt to the Shareholder in amount of MSEK 35.156 (US\$ 4.265 m) was accounted for as additional paid in capital. Decrease in long term liabilities in the consolidated statement as of December 31, 2015 by this amount was partly compensated by discounting the convertible part of the bond liability at a 9% interest rate.

Following the decision at the Company's Annual General Meeting in May 2015, the Company registered a reduction of share capital in Parent Company by MSEK 198.274 (US\$ 30.431 m) in 3rd quarter 2015. The reduction resulted in no retirement of shares. Funds of US\$ 30.431 m were transferred from share capital to additional paid in capital in the consolidated financial statement.

The Group's net assets are negative at the end of the reporting period. This is due to continuing net losses. However, the Parent Company carries positive net assets, which increased by MSEK 82.324 (US\$ 8.468 m) after the reversal of the impairment of Tardan which is partially offset by the impairment of Solcocon.

The Company possesses sufficient gold reserves to increase gold production and plans to reduce costs. At the year end December 31, 2015 impairment tests performed at the Group level showed no indications to impair the Tardan assets. As mentioned above, the Solcocon assets were impaired by MSEK 133.0 US\$ 16.0 m as of December 31, 2015. Together with depreciation and amortization accrued during 2015 this is the reason for the decrease in fixed and intangible assets by MSEK 174.6 (US\$ 25.4 m) compared to prior year.

During the reporting period all operating activities were financed via receipts from customers, VAT reimbursements and loans. Gold production depends on seasonality and working capital was covered by short term loans and borrowings. During the period the Company raised a short term bank loan of US\$ 2.5 m and successfully repaid it. During the period, the Company also repaid a long-term loan in the amount of MSEK 6.329 (US\$ 0.7 m) and as of 31 December 2015, total bank debt was equal to MSEK 370.0 (US\$ 44.3 m) (31 December 2014 – MSEK 354.259 (US\$ 45.0 m)). The bank debt/EBITDA ratio significantly improved compared to the previous period and was 4.3x at the end of 2015.

Production period of the next 12 months will be financed via receipts from operating activity and short term-borrowings. Raising of long-term financing is not required.

The consolidated cash balance as of 31 December 2015 was MSEK 0.361 (US\$ 0.043 m) (31 December 2014 - MSEK 4.711 (US\$ 0.603 m)).

Accounting principles and basis of preparation

The consolidated accounts for Auriant Mining AB have been prepared in accordance with International Financial Reporting Standards (IFRS) as described on page 61 in the annual report for financial year 2014. The evaluations and estimations made by the board of directors and management in preparing the interim report are described on page 71 in the annual report for 2014.

This interim report has been prepared in accordance with IAS 34, Interim Financial Reporting and in accordance with the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 1, Supplementary accounting regulations for groups. The parent company accounts are prepared in accordance with the Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2, Accounting for legal entities. The accounting policies for the parent are the same as for the group with the exceptions described in the annual report 2014.

The same accounting principles are applied in this interim report as in the annual report 2014.

Risks and uncertainties associated with this interim report

The group's risk exposure is presented on page 93 of the 2014 annual report. The Board of Directors believes that the most important risk factors for the time being are:

- 1) *Gold price risk:* The fluctuations of the international gold price directly influence the revenues of a gold producing company.
- 2) *Currency risk:* Auriant Mining operations and reporting is influenced by the gold price which is quoted in US\$, whereas production costs are in RUB, and reporting in SEK. Fluctuations in exchange rates could have a major impact on both local operational results and the SEK reported results.
- 3) *Political risks:* Auriant Mining currently operates only in Russia. Being a young democracy Russia does not have a stable political situation as in the more established democracies of Western Europe.
- 4) *Inflation risk:* The Russian economy has been subject to significant inflation pressure during the last few years. This directly impacts on the production costs in a gold mining company.
- 5) *Geological risk:* The recoverable gold reserves of a gold exploration and production company are influenced by geological and economic factors. The estimation of reserves is therefore at all times dependent on the international gold price, costs associated with the extraction of the gold, etc. Therefore the estimated gold reserves of any gold company may change at any point in time.
- 6) *Financial and project risk:* Auriant Mining AB is a gold mining company and is involved in production of gold as well as exploration. The company is still dependent on external financing for the development of its business. If the availability of external financing were to be reduced it would negatively influence the future outlook of the company. The currently poor sentiments on global capital markets must be taken in to account.
- 7) *Legal risks:* Auriant Mining operates in a complicated and challenging legal environment in Russia. Further, Russian tax legislation is subject to varying interpretations and frequent changes. Changes in the interpretations of tax legislation and in the legal environment may have significant impact on the company.

«In 2015 we successfully re-commissioned the gravitational plant and started mining ore at the Barsuchy deposit at Tardan. Exploration work continues in the Greater Tardan area; we are planning to announce the drilling results by the end of Q1 2016. Operations at Tardan have almost reached full capacity, gold grades are improving and the volume of ore mined is increasing. This all gives us confidence to confirm our expectations of producing 1 ton of gold in Tardan in 2016» Sergey Ustimenko, CEO Auriant Mining, said commenting on the 2015 results.
